📍 France

Working in the web industry for 8 years and counting, I acquired my technical expertise in building/developing software heavily relying on OSS.

After 2 years in London working on Symfony / PHP projects, I am back in Bordeaux since June 2016.

Devotee advocate of good practices (code reviews, SOLID principles, Continuous Integration, CQRS, ...) and agile methodologies, I always try to stay practical and keep the focus on the project objectives.

I value mentorship and popularising in order to keep cohesion and quality of discussions.

Passionate about my job and entrepreneurship, I am also a member of the team in charge of organizing PHP meetup's in Bordeaux. The goal is to promote to the community feedbacks on technologies / practices and the open source eco-system.

EXPERIENCES

Technical Expert

SensioLabs - Since November 2022 - Full-time

- Symfony trainer.
- Technical advisor.

VP Engineering

Satelia - January 2022 to September 2022 - Full-time - Bordeaux - France

- Within a medical french startup having a 4 years legacy codebase, my goal was to anticipate future growth.
- Team growth from 3 to 6 developers.
- Creation of the first DevSecOps position.
- Creation of the first Product Owner position.
- Team coaching on Symfony / PHP / Docker best practices.
- Improve dev processes by introducing code reviews.
- Team coaching on CQRS & DDD basis.
- Set up tests using PHPUnit, Deptrac & InfectionPHP
- Set up internal meetup's every 2 weeks.

Technical Consultant

SensioLabs - April 2021 to July 2021 - Freelancer

- Technical audit : Stack, Architecture, Infrastructure, Processes.
- Performance improvement on both search queries and data exports.

Tech Lead

Pichet Group - Since February 2020 - Freelancer - Bordeaux - France

- Set up a weekly meetup
- Creation of metrics about the quality of discussions in code reviews
- Optimization of tasks / knowledge distribution within the technical team
- Set up and follow up of good practices regarding several topics : coding (PHP, Js, Bash, ...), architecture, workflow, BDD structures, documentation, etc
- Technical support for project manager about technologies / schedules
- Identification of technical debt and firsts patches
- Dockerization of "legacy" applications
- Continuous Integration optimization for Symfony apps and Docker images

SKILLS

Languages

- French (Mother tongue) ●●●●●
- English (~2 years in London) ●●●●●

Dev tools & Frameworks

- OpenAPI / Swagger
- Api REST
- CQRS
- Symfony
- Doctrine
- Git Flow
- PHPUnit
- InfectionPHP

My environment

- PhpStorm
- Unix (Linux / OSX)
- Github
- Gitlab + Gitlab CI
- Kubernetes
- Docker Swarm
- Bash scripts
- Auth0

Technical basis

- PHP 8
- Git
- PostgreSQL
- Docker
- Vanilla Javascript
- Symfony 5 / 6

INTERESTS

Film

- A perfect world (1993)
- Inception
- Shutter Island
- Will Hunting

Symfony / Docker Developer

ITL Equipment Finance - July 2019 to December 2019 - Freelancer - Bordeaux - France

TMA & Build for an internal ERP style app.

- Invictus
- Forest Gump
- Ender's game
- Hidden Figures

Symfony / Docker Lead Developer

Pichet Group - June 2018 to July 2019 - Freelancer - Bordeaux - France

Set up a Service Oriented Architecture with :

- A back-office
- A chat system
- async updates (Google Pub/Sub)
- A portal
- SSO (Auth0)
- Mobile notifications (OneSignal)

Literature

- Terry Goodkind (The Sword of Truth)
- Edgar Allan Poe (Extraordinary Tales)
- Raymond E. Feist (The Riftwar Cycle)
- Dan Simmons (Carrion Comfort)
- Robin Hobb (The Farseer Trilogy)

Symfony / Docker Developer

Pichet Group - March 2017 to June 2018 - Freelancer - Bordeaux - France

- Set up a personal space
- Aggregation from multiple data sources (APIs, BDD)
- Docker infrastructure
- Set up CI (gitlab) and QA (symfony insight)
- CQRS oriented code
- Unit and functional tests
- Code / Review good practices

Founder

Roc'IT - Since January 2017 - Freelancer - Bordeaux - France

1 year in micro followed by the creation of Roc'IT

Symfony Support

Barmatic - November 2016 to February 2017 - Freelancer - Bordeaux - France

- Refactoring of DDD oriented Symfony code
- New features

Lead Developer

Phileas Stravinarius - May 2016 to December 2016 - Full-time - Bordeaux - France

- Repair of docker servers
- Set up project management (Trello)
- API improvements (Symfony2)
- Recruiting for the technical team
- Docker servers fully set up using Ansible deployments allowing a simple and autonomous deployment in under 4mins
